Dog Waste Station and related Accessories

Our Dog Waste Stations come either with either a carded or roll bag dispenser. Each Station comes has a dispenser with a lockable front cover and keys, a 10 gallon litter bin with cover, a green paint U-post, bags and hardware.

Which dispenser should I choose? There are a few important things to consider when choosing the type of dispenser you require, such as where you are installing it and is it likely to be abused by vandals or mischievous children? With the bags on a roll a child could actually pull a bag from the dispenser and start to walk away thus very quickly leaving the dispenser empty and costing you more money for replacement bags. On the other hand the carded type bags have been designed so that only one bag can only be pulled out one at a time and are therefore less wasteful. Although it is still possible for someone to take all the bags out, it is very unlikely and in both cases abuse is quite rare if the dispensers are located properly.

Each dispenser comes with a lockable front cover, keys and bolts and can hold over 600 bags. Each dispenser can be quickly and easily installed on to any post. Dispensers are constructed from heavy gauge aluminum and is powder coated in a forest green color for added durability. Dispensers can be purchased separately or in a Dog Waste Station.

There are two standard signs available. A sign as above or a sign that says "Please Clean Up After Your Pet".

Custom signage is also available, please call for pricing and information.
